

Rocket Proposal 3rd meeting

In Attendance:

Aaron Howell
Stephen Wagner
Sarah Christensen
Pablo Orophin
Mackey
Wilson

Worked on filling in the proposal and trying to work out the problems with the lack of information and research time/ability.

The proposal is almost all the way filled in.

Casey Christensen has been removed from the team due to sister's administrative authority, he can help with AUTOCAD and still not be on the team. He doesn't do anything or email back.

Might be getting more money to fund the electronics.

PR needs to write an article for the paper and fill in the cabinet in the science building.

Megan, Erin, Wilson, Aaron, need to lengthen profiles.

Brett needs to meet with Sarah to edit the proposal and Brett must be in a good mood.

Megan and Erin need to plan the educational day at the elementary school so that we can go and teach the children about rockets.

Email about info have to be given to me by Friday because it's just Monday, and about the safety signatures.

Rearrange the resumes... me first, Wilson, and then everyone in alphabetical order
