

Bible Concordance Starter

Goal:

The goal of this assignment is to make sure you are making progress toward the [full Bible Concordance assignment](#).

Part 1 Tasks:

- Download the bible text file [bible.txt](#).
- Write a c++ program that:
 - Asks the user for a phrase to search for.
 - Reads one line at a time from bible.txt until the end of the file is reached.
 - Displays to the console every line of the file that contains the search-phrase.

Example output:

```
Search Phrase? created the heaven
001:001 In the beginning God created the heaven and the earth.
042:005 Thus saith God the LORD, he that created the heavens, and
045:018 For thus saith the LORD that created the heavens; God himself
```

Part 2 Tasks:

- Start with your program from part 1
- Modify the program to display the names of the books of the bible as they are reached. Only the names of the books should be displayed, not the book and the book number.
- No user input is expected.

Example output:

```
Genesis
Exodus
...
Revelation
```

Part 3 Tasks:

- Start with your program from part 2
- Modify the program to display the names of the books of the Bible and how many chapters are found in each.
- No user input is expected.

Example output:

```
Genesis - 50
Exodus - 40
...
Revelation - 22
```
