

Write a c++ program to display the times tables in the following format. You should use two while loops to do this.

```
0 0 0 0 0 0 0 0 0 0 0
0 1 2 3 4 5 6 7 8 9 10
0 2 4 6 8 10 12 14 16 18 20
0 3 6 9 12 15 18 21 24 27 30
0 4 8 12 16 20 24 28 32 36 40
0 5 10 15 20 25 30 35 40 45 50
0 6 12 18 24 30 36 42 48 54 60
0 7 14 21 28 35 42 49 56 63 70
0 8 16 24 32 40 48 56 64 72 80
0 9 18 27 36 45 54 63 72 81 90
0 10 20 30 40 50 60 70 80 90 100
```

Submit your timesTable.cpp program on easel.

Note: Set the column width to 4 for the output of each number.

```
#include<iomanip>
```

```
cout<< setw(4) << i * j;
```
