

## Goals

1. Practice parsing strings.
2. Learn to convert strings to integers. **atoi**

## Assignment

Write a c++ program with the following functionality. Compile, run and verify your program.

1. Your program should accept a line of text input.
2. When the line contains a valid date display "Valid Date".
3. When the line contains an invalid date display "Invalid Date".
4. Be sure to check for leap years.
5. The only date format that should be considered valid is **mm/dd/yyyy**.

## Program Submission

- Turn in a printed copy of your program.
- Be sure your name is on your paper
- Be sure your papers are stapled.
