

Bitmap Assignment – Part 3 – Creative Option

Tasks for Part 3:

1. Initialize the background of your image to some pattern. This pattern may be a solid color, a series of lines or any other “texture” you would like to start with.
2. Add a comment to your file with your name and a description of the image you plan to create for this assignment.
3. Write the image to a new file. Ask the user for the filename to write to.

Note: You are not expected to have a complex design or image completed for this assignment, just proof that you are able to intentionally write to a bitmap file.
