

Pig Latin File Assignment

In this assignment you will be adding to your Pig [Latin Phrase translator](#).

Instead of getting a phrase from the user to be translated you need to:

1. Ask the user for a file name to read from.
2. Ask the user for a file name to write to.
3. Open the first file for reading.
 - a. If the file does not exist tell the user (do not create it)
4. Open the second file for writing.
5. Read one line at a time from the input file file.
6. Translate the line to Pig Latin.
7. Write the translated line to the output file.
8. Close the files.

The Pig Latin translation for this assignment should account for punctuation. Commas and periods should remain at the end of words. You do NOT have to account for other punctuation.
