Syllabus
Internet Development II - COMP 431
2:00 MWF Science 213
Spring 2012

Instructor:  Frank McCown
Contact:  501-279-4826,  HU Box 10764,  fmccown@harding.edu
Home Page:  http://www.harding.edu/fmccown/classes/comp431-s12/  (Syllabus, useful links)
Office Hours:  Science 208:   3 – 5 MWF, 10 – 11 am and 4 – 5 TR, or by appointment

Course Description

This course is a continuation of Comp 250.  It is assumed you have a solid foundation in XHTML, client and server-side scripting, and CGI programming.  Topics covered include jQuery, Glassfish & Tomcat, Java servlets, Java Server Pages (JSPs), JavaServer Faces, Web services, and XML applications.  Prerequisite: COMP 245 and COMP 250, Co-requisite: COMP 345.

Required textbooks:   Java EE 6 with GlassFish 3 Application Server by David Heffelfinger (2010).  ISBN: 1849510369

Exams

Two regular exams will be given in class as well as a final comprehensive exam covering the entire course and, in more detail, the information presented since the 2nd exam.  If you are unable to take an exam as scheduled due to a serious illness or some other emergency, it is your responsibility to call me and leave a message before the exam or as soon as you are physically able.  If an official school function takes you out of class on an exam date, it is your responsibility to make arrangements one week prior to the exam as to when you will take the exam.  Usually it will be given early, not late.  Makeup exams for excused absences will be given, but a penalty of up to 75% will apply for unexcused absences, at the teacher’s discretion.

Programming Projects

There will be three major programming projects which will take a significant amount of time to complete outside of class.  These projects will require you to integrate the information learned in class and from the text books.  All source code should conform to “McCown’s Tips to Writing Clean Code” (link available from the class website).

You may work independently on all programs or in pairs (two people only) when permitted.  Pair programming has been shown to have a number of benefits including increased personal satisfaction and fewer errors1.  If you work in pairs, both of you must work together on a single computer, and both of you must write approximately half of the code.  No code can be written without the other partner present and watching.  Both of you should understand completely what is being written since you will have to complete your exams individually.  When you submit a program to Easel that has been written in pairs, you must put comments in your code indicating the names of both programmers.  Only one student needs to submit their program.

Quizzes and Assignments

Quizzes over reading assignments will be worth 10 points each.  Other 10 point assignments will be given as homework and averaged into the quiz scores.  All quizzes will be taken on Moodle before the class period on which the quiz is due.  Even if you are absent from

---

1 See All I Really Need to Know about Pair Programming I Learned in Kindergarten (2000) for more information on effectively using pair programming at http://citeseer.ist.psu.edu/williams00all.html.
Extra Credit

The McChallenge: 1% will be added to your final grade for the completion of a program which will be made available to you later in the semester. The program will be due the Friday before final exams. You can skip the program and still get the 1% added to your final grade if you beat me in a game of basketball, tennis, racquetball, Halo, chess, Trivia Pursuit, or any other sport/game that I know how to play. If you lose, you still may complete the program to get your 1%. Only one challenge per semester, and all challenges must be made before the final week of class. Come by my office to schedule a time to play.

Grades

Final grades will be computed as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exams</td>
<td>30%</td>
</tr>
<tr>
<td>Projects</td>
<td>30%</td>
</tr>
<tr>
<td>Quizzes and Assignments</td>
<td>20%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>20%</td>
</tr>
</tbody>
</table>

Standard letter grades: A = 90-100%, B = 80-89% C = 70-79%, D = 60-69%, F = 0-59%

Late work: A maximum of 10% will be taken off each day (not each class period) a program or assignment is late, up to 50%. Every day is counted, including weekends. Nothing late more than 1 week will be accepted.

Expectations

1. It is important that you check your e-mail regularly (everyday) because I occasionally give hints or corrections to homework assignments via e-mail. This is also the best way to communicate with the class outside of the classroom.

2. I expect every one of you to hold to the highest standard of personal conduct and integrity. Cheating in all its forms is inconsistent with Christian faith and practice and will result in sanctions up to and including dismissal from the class with a failing grade. Homework should be completed individually (not in teams or pairs), and it should be your work, not the work of someone else. One thing that you should never do is give someone your source code... this often leads to cheating. Come by during office hours (or we'll arrange a time) for assistance on programs.

3. I expect you to adhere to the dress code as spelled out in the Student Handbook. This includes (men) removing caps while in class. Please wear shoes to class (flip flops are OK).

4. There is no food or drink permitted in the lab. This is expensive equipment and carpeting that is easily spoiled by an accident.

5. Lab computers may be used during class to take notes and write programs. Students that use the computers for other purposes (e-mail, surfing the Web, Facebook, games, etc.) will not be allowed to use the lab computers.

6. Silence your cell phones.

This course covers a broad array of topics, and it will take significant effort, persistence and practice to master all the concepts. Make sure you have allocated sufficient time in your daily schedule for working on homework and projects. Students who do the best in this course attend class regularly, turn in homework and assignments on time (because they don’t procrastinate), and seek help from me when in a rut. Remember that I am here to help you.

Students with Disabilities

It is the policy for Harding University to accommodate students with disabilities, pursuant to federal and state law. Therefore, any student with a documented disability condition (e.g. physical, learning, psychological, vision, hearing, etc.) who needs to arrange reasonable accommodations, must contact the instructor and the Disabilities Office at the beginning of each semester. (If the diagnosis of the disability occurs during the academic year, the student must self-identify with the Disabilities Director as soon as possible in
order to get academic accommodations in place for the remainder of the semester.) The Disabilities Office is located in Room 102 of the Lee Academic Center, telephone, (501) 279-4019.

**Schedule**

The following schedule is subject to change but gives you an idea of how the class will progress:

<table>
<thead>
<tr>
<th>Week 1</th>
<th>Week 2</th>
<th>Week 3</th>
<th>Week 4</th>
<th>Week 5</th>
<th>Week 6</th>
<th>Week 7</th>
<th>Week 8</th>
<th>Week 9</th>
<th>Week 10</th>
<th>Week 11</th>
<th>Week 12</th>
<th>Week 13</th>
<th>Week 14</th>
<th>Week 15</th>
<th>Week 16</th>
</tr>
</thead>
</table>
| Introductions| Ch 1 & 2 – Intro to JQuery
JavaScript & HTML5 review | Ch 3 – Intro to GlassFish
Ch 2 - Servlets | Ch 4 – Styling and animation | Ch 5 – Manipulating the DOM
Ch 6 – Ajax | Ch 1 - Intro to GlassFish
Ch 2 - Servlets | Ch 3 – JavaServer Pages
Ch 4 – JSP Standard Tag Library | Week 8 | Ch 5 – Database Connectivity | Ch 6 – JavaServer Faces | Exam 1 | Exam 2 | Ch 8 – Security
Week 11 | Ch 9 – Enterprise JavaBeans | Ch 10 – Contexts and Dependency Injection | Week 14 | Ch 11 – Web Services with JAX-WS | Week 15 | Slack | Week 16 | Final Exam |
